READING INSTRUCTION COMPETENCE ASSESSMENT®

WRITTEN EXAMINATION

Practice Test

(effective as of the August 8, 2009, test administration)

Developed by the Evaluation Systems group of Pearson and the Commission on Teacher Credentialing

National Evaluation Systems is now the Evaluation Systems group of Pearson.
WRITTEN EXAMINATION
PRACTICE TEST FORM
You should have in front of you:

(1) a test booklet,
(2) an Answer Document,
(3) a Case Study Response Booklet, and
(4) a No. 2 lead pencil.

*IF YOU DO NOT HAVE ALL OF THESE MATERIALS, PLEASE INFORM THE TEST ADMINISTRATOR. PLEASE REMOVE ALL OTHER MATERIALS FROM YOUR DESK.*

**GENERAL DIRECTIONS**

This test consists of two sections: (1) a multiple-choice question section, containing 70 multiple-choice questions [questions 1 to 70] and (2) an open-ended assignment section, containing five assignments requiring written responses [Assignments A to E]. Each section represents approximately half of the total examination score.

The directions for each section appear immediately before that section. You may work on and complete the multiple-choice questions and the open-ended assignments in any order that you choose. As you are working, you may want to use the checklist on the following page to keep track of which parts of the test you have completed. Be sure to allocate your time carefully so you are able to complete the entire test within the testing session.

**FOR SECURITY REASONS, YOU MAY NOT TAKE NOTES OR REMOVE ANY OF THE TEST MATERIALS FROM THE ROOM.** You may use the margins of this test booklet for scratch paper, but only the responses recorded in your Answer Document and your Case Study Response Booklet will be scored.

The words "End of Test" follow the last open-ended assignment (Assignment E). You may go back and review your answers at any time during the testing session. When you are sure you have answered all questions, completed all assignments, and properly recorded all of your responses in your Answer Document and Case Study Response Booklet, raise your hand. Your test materials will be collected, and you may leave. Your test materials must be returned to a test administrator when you finish the test.

If you have any questions, please ask them now before beginning the test.
CHECKLIST

As you are working, you may want to use the following checklist to keep track of which parts of the test you have completed.

___ Section I: Multiple-Choice Questions 1–70
   Record each answer in the space that corresponds to the question number.

___ Section II: Open-Ended Assignments
   ___ Assignment A response recorded on the Assignment A Response Sheet (1-page sheet)
   ___ Assignment B response recorded on the Assignment B Response Sheet (1-page sheet)
   ___ Assignment C response recorded on the Assignment C Response Sheet (2-page sheet)
   ___ Assignment D response recorded on the Assignment D Response Sheet (2-page sheet)
   ___ Assignment E: Case Study response recorded in the Case Study Response Booklet (4-page booklet)
DIRECTIONS FOR SECTION I: MULTIPLE-CHOICE QUESTIONS
Questions 1 to 70

Each question in this section is a multiple-choice question with four answer choices. Read each question carefully and choose the ONE best answer. Record each answer on page one or two of the Answer Document in the space that corresponds to the question number. Completely fill in the circle having the same letter as the answer you have chosen. *Use only a No. 2 lead pencil.*

**Sample Question:**
1. What is the capital of California?
   - A. Los Angeles
   - B. San Diego
   - C. Sacramento
   - D. San Francisco

The correct answer to this question is C. You would indicate that on the Answer Document as follows:

1. [ ] A [ ] B [ ] C [ ] D

Try to answer all questions. In general, if you have some knowledge about a question, it is better to try to answer it. You will not be penalized for guessing.

STOP

DO NOT GO ON UNTIL YOU ARE TOLD TO DO SO.
1. A sixth grader who is advanced in most areas of reading has difficulty completing assigned reading selections. He appears motivated when he begins reading, but he has difficulty keeping his attention on the task at hand. Which of the following would be his teacher's best initial strategy for addressing this difficulty?

A. adapting the student's reading assignments to reduce their complexity and level of cognitive challenge  
B. telling the student that his grades will be based in part on his ability to improve his concentration when he works on reading assignments  
C. breaking down the student's reading assignments into small steps and helping him learn to monitor his own attention and progress  
D. managing the student's reading assignments so that he generally has only one to work on at any given time

2. When creating lesson plans to promote specific reading skills, a teacher should make sure that:

A. each planned activity for students is designed to strengthen two or more specific reading skills.  
B. the targeted reading skills relate to an appropriate instructional progression and reflect students' needs.  
C. each planned activity connects students' reading, writing, listening, and speaking skills.  
D. the targeted reading skills are grade-appropriate and taught to all students using the same instructional methods.

3. An early elementary teacher could most effectively support at-home reading by:

A. sending parents/guardians a regular newsletter describing classroom reading activities.  
B. sharing with parents/guardians important articles from professional reading journals.  
C. recommending books that parents/guardians would likely enjoy reading with their children.  
D. providing parents/guardians with periodic reports on their children's progress in reading.

4. A sixth-grade teacher wants to ensure that the classroom reading environment supports content-area learning for the English Learners in the class. Which of the following strategies is likely to be most effective in addressing this objective?

A. replacing classroom content-area books with simpler texts on the same subjects that the English Learners can understand more readily  
B. providing English Learners with grade-level, English-only content-area books to promote academic language  
C. making available in the classroom content-area texts at various levels that supplement and reinforce the information presented in students' textbooks.  
D. setting up an area in the classroom where students can go to reread the content-area textbook quietly and independently.
5. Of the following questions, which would be most important for a teacher to consider when interpreting the results of a reading assessment for a particular student?

A. How did the student’s performance on this assessment compare with that of the student’s classmates?

B. Are these findings sufficient to assign a grade to the student’s performance?

C. How do these findings relate to the student’s performance on other recently administered reading assessments?

D. Do these findings provide information about the student’s ranking in regard to national norms of reading achievement?

6. A fourth-grade class includes two students with Individualized Education Programs (IEPs). When planning classroom entry-level and progress-monitoring assessments for these students, the teacher should:

A. make arrangements for the students to be tested in an environment that is quiet and free from distractions.

B. consult the Reading/Language Arts Framework for California Public Schools to determine appropriate assessments for students with IEPs.

C. recognize that these students may require additional time to complete their work on these assessments.

D. consult each student’s IEP to determine any specific testing accommodations required for that student.

7. A middle school teacher is preparing for the class to take the sixth-grade California Standards Test (CST) in English-language arts. The teacher believes that a student in the class with a Section 504 Plan would perform significantly better on the assessment if she were allowed to have frequent supervised breaks within sections of the test. Which of the following guidelines would be most important for the teacher to follow to ensure that arrangements for this student during the test are appropriate?

A. providing the student with this testing accommodation only if it is specified in her Section 504 Plan

B. using good teacher judgment to determine if such an accommodation is warranted

C. following whatever accommodations are generally recommended for students with Section 504 Plans

D. requesting testing accommodations for the student in writing at least eight weeks before the test is given
8. Midway through the year, a second-grade teacher convenes a student success team to plan additional support for a student who is performing somewhat below grade-level standards in reading. Other members of the team include the student and her parents, another teacher who works closely with the student, and a school administrator. In the context of developing an improvement plan for the student, which of the following pieces of information would be most important for the teacher to communicate to the success team?

A. a comparison of the student's reading skills with those of her peers who are performing at grade level
B. a list of each of the formal and informal reading assessments that the student has taken so far during this school year
C. a list of appropriate formal reading assessments that could be used for the student's summative evaluations
D. a description of the student's assessed strengths and weaknesses that could serve as a foundation for addressing her needs

9. A kindergarten teacher plays the following game with students. The teacher says, "Guess whose name I'm going to say now?" The teacher then says the initial sound of a student's name (e.g., /m/ for Mariko), and the children try to guess the name. This activity is likely to promote the reading development of students primarily by helping them:

A. blend separate sounds in words.
B. recognize that a spoken word is made up of sounds.
C. understand the principles of phonics.
D. learn how to spell their own names.

10. Which of the following informal assessments would be most appropriate to use to assess an individual student's phonemic awareness?

A. asking the student to identify the sound at the beginning, middle, or end of a spoken word (e.g., "What sound do you hear at the end of step?")
B. having the student listen to a tape-recorded story while looking at the book and then answer several simple questions about the story
C. asking the student to identify the letters in the alphabet that correspond to the initial consonant sounds of several familiar spoken words
D. having the student listen to the teacher read aloud a set of words with the same beginning sound (e.g., train, trap, trouble) and then repeat the words
11. A kindergarten teacher is preparing a student for a phonemic awareness assessment.

   Teacher: What is this a picture of? [The teacher displays a picture of a boat.]

   Student: A boat?

   Teacher: A boat, that's right. Now, let's say the word boat together very slowly: /b/.../o/.../a/. [The student pronounces the word with the teacher.]

   Teacher: How many sounds do you hear? /b/.../o/.../a/... [The teacher slowly repeats the word.]

   Student: Three?

   Teacher: That's right, three. Now, I'd like you to do this for some more words.

This assessment would be an appropriate way to test the student's ability to perform which of the following phonemic awareness tasks?

A. counting and blending the phonemes in a word

B. identifying onsets and rimes

C. recognizing how many phonemes are contained in a word

D. relating phonemes to letters

12. The use of rhyming texts for kindergarten read-alouds is likely to promote the reading development of kindergarten students primarily by:

   A. fostering their phonological awareness.

   B. increasing their vocabulary knowledge.

   C. enhancing their understanding of story elements.

   D. improving their letter recognition skills.

13. Which of the following strategies would best help a kindergarten student who is having difficulty visually distinguishing between the letters b and d?

   A. helping the student focus on the directionality of each letter as the student traces it

   B. having the student look for the letters within the text of a favorite picture book

   C. repeating the name of each letter several times as the student points to the letter

   D. encouraging the student to observe closely as the teacher writes the letters
14. A first grader can identify the letters of the alphabet and decode a number of simple words. He becomes confused, however, when tracking print in consecutive lines of print. Which of the following strategies is likely to be most effective in helping the student read a short paragraph of simple text?

A. Help him sound out unfamiliar words included in the text before he attempts to read the entire paragraph.

B. Have him use his finger or a marker as he reads the text.

C. Help him increase his reading rate to improve his understanding of the continuity between words and sentences in the paragraph.

D. Modify the paragraph by using a yellow highlighter to identify natural groupings of words and phrases within the paragraph.

16. An emergent reader frequently reverses some letters and numbers during writing tasks. Which of the following strategies would be most effective in helping this student develop more accurate letter formation skills?

A. providing the student with supplemental practice writing lists of words that are spelled with the target letters

B. having the student practice tracing the target letter shapes with a finger while saying aloud the sequence of steps to form each letter

C. providing the student with a supplemental handwriting workbook that describes the formation of the target letters in a series of steps

D. encouraging the student to vocalize words when writing, especially when the words contain the target letters

15. Which of the following instructional practices would be most effective in promoting kindergarten students' understanding of the alphabetic principle?

A. routinely saying the sounds in words when writing the words on the board

B. creating a writing center in the classroom, stocked with paper and writing implements

C. labeling key objects in the classroom such as the clock and tables

D. stopping frequently during read-alouds to carefully pronounce and define important words

17. In the word *chimpanzee*, which of the following pairs of letters is a digraph?

A. *ch*

B. *mp*

C. *an*

D. *ee*
18. A kindergarten student has demonstrated the ability to write words phonetically, but she is reluctant to write because she is worried about misspelling words. The teacher could best promote the student's reading and writing development by:

A. reassuring her that it is okay for now to express herself in writing by spelling words as they sound.

B. giving her a spelling list of high-frequency sight words to copy and learn each day.

C. helping her make a list of words that she already knows how to spell correctly.

D. suggesting that she spend time copying some of the words found in her favorite stories.

19. During which of the following stages of spelling development do students typically begin to show an understanding of the correspondence between letters and sounds?

A. precommunicative

B. semiphonetic

C. phonetic

D. transitional

20. Function words such as to, the, and of are most appropriately taught in the context of which of the following areas of reading instruction?

A. phonics skills practice

B. structural analysis skills

C. academic-language development

D. sight-word vocabulary

21. A first-grade teacher provides students with explicit, systematic phonics instruction to promote their reading development. When designing activities to teach letter-sound correspondences, the teacher should:

A. provide reading opportunities for students to practice sounds in context after studying the sounds in isolation.

B. make certain that students have mastered vowel sounds before focusing on consonants.

C. ensure that students master the spelling of practice words using the target sound before teaching a new sound.

D. include instruction in related consonant blends when introducing individual consonants.
22. Early in the school year, a first-grade teacher wants to conduct an assessment of students' ability to read grade-appropriate words, including phonetically regular words and high-frequency irregular sight words. Which of the following informal assessments would be most appropriate and effective for this purpose?

A. The teacher pairs each student with a partner for shared oral reading of simple texts and makes anecdotal notes on their performance.

B. The teacher meets individually with students and asks each student to write a list of words the student knows how to read.

C. The teacher allows each student to select a grade-appropriate text from the classroom library and asks each student to try reading the text aloud.

D. The teacher prepares a list of grade-appropriate words, asks each student to try reading the words aloud, and records the results.

23. Several first graders have mastered sounding out and blending words that follow simple short-vowel phonics patterns. Their teacher would like to help them begin to develop whole-word reading (i.e., automatic word recognition) of words that follow these patterns. Which of the following instructional approaches would be most effective for this purpose?

A. using teacher read-alouds followed by echo reading and then choral rereading of the students' favorite texts that include some simple words

B. scheduling frequent silent independent reading practice of word lists based on the students' oral language vocabulary

C. providing modeling and guided student practice sounding out simple, regular words subvocally and then reading them aloud normally

D. exposing students to common environmental print to provide frequent exposures to everyday words and phrases
24. When reading aloud texts, a second-grade English Learner often makes errors in pronunciation that are unrelated to her ability to accurately decode the words. The teacher’s best response would be to:

A. write down words the student mispronounces and include them on a list for her to practice reading aloud.

B. analyze the student’s pronunciation patterns and plan an intervention to address difficulties that may affect her reading comprehension.

C. encourage other students in the class to help the student work on improving her accuracy in pronunciation.

D. help the student avoid having pronunciation errors count as reading miscues by stopping her and having her correct her own errors.

25. Which of the following approaches would be most effective in helping first-grade students who have the prerequisite decoding skills learn to decode words that end in the inflectional morpheme -ing?

A. explicitly teaching the students to read the unit -ing in isolation before teaching them to decode familiar words that end in the inflection

B. using think-aloud during a guided reading to model how to use contextual analysis as a strategy for recognizing words ending in -ing

C. having students practice reading word lists that include words ending in both the more familiar rime -ing as well as the inflection -ing

D. teaching the inflectional ending -ing in the context of an instructional unit on identifying open and closed syllables in multisyllabic words

26. An eighth-grade teacher wants to help students improve their spelling of scientific vocabulary, including the terms listed below.

barometer  
centimeter  
dehydrate  
hydrogen  
microscope  
telescope  
thermal  
thermometer

Which of the following instructional strategies is likely to be most effective for this purpose?

A. showing students how to divide scientific terms into syllables to facilitate accurate spelling

B. conducting practice drills to help students memorize the irregular spelling patterns of the words

C. familiarizing students with the spelling and meaning of Greek morphemes in scientific terms

D. helping students determine correct spellings by dividing the words into onsets and rimes
27. A sixth-grade teacher observes that several students have misspelled the word pasteurize. After writing pasteurize and Louis Pasteur on the board, the teacher explains how Pasteur invented the process of pasteurization. Students then discuss how the word Pasteur relates to the word pasteurize. This instructional activity fosters students’ reading and writing development primarily by:

A. helping them learn to use etymology to improve spelling and decoding of multisyllabic words.
B. helping them improve their ability to distinguish between similarly spelled words.
C. motivating them to use orthographic patterns to expand their vocabulary knowledge.
D. motivating them to improve their spelling and decoding through the use of systematic study skills.

28. A third-grade student who is an advanced learner has already demonstrated mastery of the derivational suffixes -ness and -ment, which will be the focus of an upcoming whole-class decoding and spelling lesson. Which of the following strategies for differentiating instruction for this lesson would be most appropriate for this student?

A. having the student work on inflectional suffixes
B. teaching the student the content planned for the following lesson
C. encouraging the student to engage in independent silent reading
D. introducing the student to higher-level derivational suffixes

29. Which of the following word pairs are homophones?

A. answer and reply
B. playful and replay
C. table and stable
D. sight and site

30. A second-grade teacher would like to include independent silent reading as one of several approaches used to promote students’ fluency development. When planning differentiated fluency instruction for individual students in the class, the teacher should keep in mind that using independent silent reading to promote fluency:

A. is most critical for students whose sight-word knowledge is below grade level.
B. should be limited to narrative texts in the early elementary grades.
C. is most effective when students select texts at or above their instructional reading level.
D. should be limited to students who have already acquired automaticity.
31. A fourth-grade student who reads grade-level narrative texts with fluency and excellent comprehension is struggling to read aloud a grade-level content-area passage about a topic with which the student is familiar. The student reads the passage hesitantly, frequently stopping to reread clauses or entire sentences. Afterward, the student demonstrates limited comprehension of what was read. Which of the following factors is most likely disrupting the student's fluent reading of this text?

A. insufficient background knowledge to support basic comprehension of the text

B. lack of experience with the academic-language structures used in the text

C. insufficient monitoring of comprehension while reading the text

D. lack of grade-level word analysis skills for accurate decoding of the words in the text

32. Which of the following instructional activities would best help upper-elementary English Learners develop intonations and rhythms of the English language to support fluent reading?

A. leading a class discussion on an age-appropriate topic, then having each student read aloud a section of a text that is written about the same topic

B. having the students record their own oral reading of a passage and then listen to the recording while silently rereading the passage

C. giving an expressive oral reading of a short text, then having the students echo read the text as the teacher reads it aloud again

D. encouraging the students to practice reading aloud a text in which stressed words and punctuation marks are highlighted
33. A second-grade teacher would like to plan an activity to improve the reading rate of two students who read at about the same rate and level and are both automatic readers. Which of the following activities would best address the students' needs?

A. a cooperative silent reading activity, in which the students read the same passage together silently, stopping periodically to share their understanding of the text

B. a repeated reading activity, in which each student takes several turns reading aloud a decodable passage to the other student while the other student follows along silently

C. a paired reading activity, in which the students sit side by side and read a shared text aloud in unison, gradually increasing their pace as they proceed through the text

D. a timed partner-reading activity, in which the students take turns silently reading a shared text for one minute while the other student keeps time and says when to stop

34. A second grader has demonstrated the ability to decode individual words accurately, but she reads very slowly and laboriously. When the teacher tries to engage the student in oral reading activities, she says she feels "embarrassed" and would rather read silently. Which of the following modifications to instruction would be most appropriate and effective for helping this student improve her reading fluency?

A. encouraging her to serve as an "audience" for other students' oral reading until she demonstrates willingness to read aloud herself

B. having her reread a text several times using whisper reading to build her fluency and confidence with respect to the text

C. teaching her how to use self-monitoring as she reads to improve her literal comprehension and ability to read with prosody

D. providing her with explicit phonics instruction to improve her word identification skills before requiring her to read aloud
Use the information below to answer the two questions that follow.

In an oral fluency assessment at the beginning of the school year, a third-grade student reads aloud an unfamiliar passage selected by the teacher while the teacher records the student's reading performance on a separate copy of the text, noting the student's reading time and then calculating the student's oral reading fluency score. The teacher's annotated copy of the passage appears below.

Tanya climbed out of bed and looked out the window. Her uncle's moving van was parked close to the back door. Tanya could hear the clatter of dishes in the kitchen. She went to see what was happening. Her mother was busy packing pots and pans into boxes.

Pages of newspaper were scattered all over the floor.

"Good morning, Sunshine!" Tanya's mother called out. "Are you ready for breakfast? I made pancakes."

"I'm not very hungry, Mom," answered Tanya gloomily. "I'll be in my room packing."

This was the last weekend Tanya would spend in the home where she had grown up. She had never lived anywhere else. Tanya loved this old place—her bright bedroom, the long hallway with her childhood drawings still taped to the walls, her street, her school, her town. Most of her friends were only a bike ride away. She couldn't imagine leaving all this behind.

---

Time: **155 sec.**

**Oral Reading Fluency (ORF):** **57 wcpm/ 98% accuracy**

---

**Key:**
- Omission
- Short pause
- Repetition
- Self-correction
- Insertion
- Long pause
- Substitution

**Notes:**
- Fall 50th percentile benchmark is 71 wcpm (words correct per minute).
35. Based on the student's reading performance on this assessment, instruction to increase the student's reading fluency should focus primarily on:

A. enhancing the student's contextual analysis skills.
B. promoting the student's automatic word recognition.
C. improving the student's academic-language skills.
D. expanding the student's oral vocabulary knowledge.

36. When reading the last sentence of the passage, the student pronounces the word *imagine* as [im mə' jin]. Evidence from this assessment best supports which of the following interpretations of this word-reading error?

A. The student recognizes the base word but is unaware of phonological shifts that apply to the derived form.
B. The student is unfamiliar with syllabication rules governing medial consonants.
C. The student does not apply the appropriate phonics generalizations to the last two syllables of the word.
D. The student applies syllabication and phonics rules correctly but does not recognize the word.
37. Lately, when choosing a book to read, a third grader who reads at grade level always selects books from a series that is written in a very formulaic style that does little to extend his conceptual or language development. The teacher's best response to this behavior would be to:

A. avoid interfering with the student's selection of books as long as he finds his choices enjoyable.

B. provide the student with books with similar themes or on similar topics that are more challenging for him.

C. point out to the student some of the major limitations of the books he is choosing to read and ask him not to read those books at school.

D. advise the student that he should choose books that will prepare him for the more difficult reading he will encounter in fourth grade.

38. A second-grade student has limited vocabulary knowledge, which hinders the student's word recognition and reading comprehension. The student's oral reading is slow and labored, and the student typically spends the majority of independent reading time browsing through books, making little effort to read the actual words on the page. Research has shown that which of the following is most likely to happen if this student receives no instructional intervention?

A. The student will always be behind average-performing peers but will achieve an adequate reading level to be academically successful.

B. The student will naturally begin to show more interest and proficiency in reading as the student matures and will catch up with average-performing peers in third grade.

C. The student will remain approximately at a second-grade reading level and will not be able to progress beyond this level.

D. The student will begin to fall behind peers in reading development and will continue to fall further behind in later grades as texts include increasingly difficult vocabulary.
39. Which of the following statements best explains an important limitation of teaching students to rely on context as their primary strategy for determining the meaning of unfamiliar words in texts?

A. Context clues have limited usefulness for students who already have well-developed background knowledge related to a text's subject or content.

B. Using context to determine the meaning of an unfamiliar word disrupts students' reading fluency more significantly than simply consulting a dictionary.

C. Explicit context clues about a word's meaning are not very common in most texts, while implicit contextual clues often require students to apply background knowledge they lack.

D. Overreliance on context as a word-learning strategy hinders students' vocabulary growth, since they should be learning most new words in direct vocabulary instruction.

40. A fifth-grade teacher is planning a multidisciplinary unit on water pollution. For this unit, students will read chapters from their social studies and science textbooks as well as relevant fictional narratives. These materials will also be incorporated into a variety of instructional activities designed to promote students' reading development. Which of the following statements best describes an important advantage of using a cross-curricular approach such as this unit to promote students' reading development?

A. Interdisciplinary reading instruction provides more opportunities for teachers to tailor teaching strategies to the needs of individual students.

B. Reading instruction that focuses on both literature and content-area texts helps students recognize and understand differences between written and oral English.

C. Interdisciplinary reading instruction motivates students to apply a variety of word identification strategies to clarify the meaning of texts.

D. Reading instruction that integrates a variety of related texts promotes deep processing of new vocabulary through multiple exposures to key words and concepts.
41. A middle school teacher writes the morpheme *dict* on the board, pronounces it, and explains that *dict* derives from the Latin word for "speak." The teacher then asks students if they can think of English words that start with or include *dict*. The teacher uses the students' suggestions to create the diagram shown below.

![Diagram](image)

This activity is likely to promote students' vocabulary development primarily by helping the students:

A. recognize common prefixes and suffixes.

B. learn the techniques of concept mapping.

C. apply knowledge of word roots as a word-learning strategy.

D. draw on a knowledge of phonics to unlock word meanings.
42. A teacher substitutes blank spaces for several nouns, verbs, adjectives, and adverbs in an appropriate level text and asks students to determine reasonable and logical words to complete each blank. This technique is useful as an informal assessment of students' understanding of English language structures primarily because it requires them to:

A. define various grammatical categories in their own words.
B. select appropriate words based on their grammatical function as well as on their meaning.
C. group words into grammatical categories to clarify their meaning.
D. draw on grammatical knowledge to identify the subjects and predicates of complex sentences.

43. A fifth-grade teacher gives students the following sentence:

Neither walking on the beach nor running around the track cheered Ahmed up.

The teacher asks the students how the phrases that come just after *neither* and just after *nor* are similar. This exercise can promote students' reading comprehension by helping them:

A. distinguish between explicit and implied main ideas.
B. apply literal comprehension skills.
C. identify cause-and-effect relationships.
D. recognize parallel grammatical structures.

44. A middle school teacher designs an instructional activity in which students combine several sentences to form a single sentence, as illustrated below.

**Combine:**
Matthew stood and waited for the bus. The sun was blazing hot. Matthew fanned himself with the newspaper.

**Single sentence:**
Waiting for the bus, Matthew stood in the blazing sun, fanning himself with the newspaper.

This activity is likely to be most effective in helping students:

A. strengthen their ability to comprehend and write complex sentences.
B. apply literal comprehension skills to identify and write main idea statements.
C. improve their inferential comprehension skills.
D. use self-monitoring techniques to clarify the meaning of text.

45. Structural analysis would be the most appropriate strategy for a student to use to determine the meaning of which of the following words?

A. impassable
B. elephant
C. interim
D. examine
Use the information below to answer the four questions that follow.

A sixth-grade teacher reads his students the nonsense poem "Jabberwocky" by Lewis Carroll. The first four lines of the poem are shown below.

'Twas brillig, and the slithy toves
Did gyre and gimble in the wabe;
All mimsy were the borogoves,
And the mome raths outgrabe.

46. The teacher reads aloud the clause "All mimsy were the borogoves" and asks students what that might mean. One student responds, "It means that the borogoves were all mimsy!" This student's response demonstrates skill in which of the following reading comprehension strategies?

A. applying relevant content knowledge
B. recognizing cause-and-effect relationships
C. analyzing the use of figurative language
D. interpreting unusual grammatical constructions

47. The teacher plans a variety of activities related to "Jabberwocky." Students will work in pairs to make up definitions for some of the nonsense words (e.g., slithy). They will read the poem aloud using tone of voice to express various moods. Finally, they will create their own nonsense poems and give oral readings of them. These activities are most likely to promote students' reading development by:

A. providing students with the opportunity for an in-depth analysis of a specific literary genre.
B. developing students' understanding of the differences between written and oral English.
C. fostering students' enjoyment of playing with and thinking about language.
D. helping students make distinctions between serious and whimsical literature.
48. One student pronounces *gyre* with a hard *g* sound, while his classmate uses a soft *g* sound. They ask the teacher who is correct. The teacher's best response would be to:

A. remind students to use their knowledge of syntactic principles to determine the pronunciation.

B. explain that one strategy for determining a likely pronunciation of a new word is to consider other words that contain a similar root (e.g., *gyrate, gyroscope*).

C. have the class vote and suggest that students use the pronunciation that is preferred by the majority.

D. advise them that since *gyre* is a nonsense word, it does not really matter whether they pronounce it with a hard *g* or a soft *g*, so both pronunciations are correct.

49. The teacher asks the students if they can tell which of the nonsense words in the poem are nouns. One student says that *toves* is a noun. Another says that *wabe* and *borogoves* are nouns and adds that *gyre* and *gimble* are verbs. The class then discusses how students were able to draw these conclusions. This exercise would be especially useful for helping students understand that:

A. being familiar with conventions of capitalization and spelling can help a reader interpret a text.

B. recognizing the roots of words can help a reader decode the words.

C. being familiar with common language structures can help a reader interpret a text.

D. recognizing a text's genre can help a reader comprehend the text.
Use the information below to answer the three questions that follow.

A sixth-grade class that includes several English Learners has been studying volcanoes. The teacher designs the following paragraph-building activity as part of a chapter review toward the end of the unit.

Step 1: The teacher leads a brief whole-class discussion reviewing key topics covered by the textbook chapter.

Step 2: Students form heterogeneous cooperative learning groups with three or four students in each group. Each of the students selects one of the key topics reviewed during the discussion.

Step 3: Individual students write one or two sentences about their topic on sentence strips.

Step 4: The members of the group then decide how to put the various sentences together, editing the sentences as necessary to form a comprehensible paragraph about the chapter and correcting any errors in grammar or spelling.

After participating in this activity, all of the students review the chapter in their science text about volcanoes.

50. The paragraph-building activity described is likely to promote students' reading development primarily by helping them:

A. apply knowledge of common text structures to improve comprehension as they read.

B. transfer skills from oral language to written language.

C. use a variety of word identification strategies.

D. understand differences between spoken and written English.
51. After assessing the effectiveness of this activity, the teacher decides to include an additional step. For step 5, the teacher will guide students to develop topic sentences for the paragraphs they generated. This modification is most likely to promote students' reading development by:
   
   A. encouraging students to draw on prior knowledge to clarify their understanding as they read.
   
   B. helping students distinguish between facts and opinions as they read.
   
   C. encouraging students to apply vocabulary knowledge in new contexts.
   
   D. helping students recognize main ideas and how supporting details relate to main ideas.

52. Which of the following best describes one important way in which this activity is likely to benefit English Learners?
   
   A. Arranging sentences in a meaningful order helps English Learners develop skills for locating and retrieving related information from content-area texts.
   
   B. Combining sentences into paragraphs encourages English Learners to employ a variety of word identification strategies.
   
   C. Discussing and writing about a content-area topic support English Learners' reading related to the topic by reinforcing key concepts and academic-language development.
   
   D. Analyzing and editing individual sentences improve English Learners' reading fluency by helping them chunk text as they read.
53. To promote students' comprehension of a passage about comets and meteoroids, a middle school teacher shows the students how to use facts from the text to complete the following Venn diagram.

![Venn Diagram with comets and meteoroids]

This comprehension strategy is most effective in facilitating students' ability to:

A. use inferential comprehension skills to identify cause-and-effect relationships.
B. draw on their prior knowledge to clarify understanding.
C. organize textual information according to similarities and differences.
D. apply their vocabulary knowledge in new contexts.

54. An eighth-grade class will be reading a drama that is a challenging grade-level text. The teacher is concerned that a student in the class who has a reading disability will have difficulty keeping up with and understanding the reading assignments. Which of the following strategies would be most effective for the teacher to use to promote the student's access to the text and his ability to participate fully in class discussions related to it?

A. assigning the student the play several weeks before his classmates are scheduled to begin reading it
B. providing the student with a narrative version of the play to read rather than the original, dramatic version
C. assigning the student only selected portions of the play, such as a few key speeches and dialogues
D. providing the student with an audiotape recording of the play to listen to in conjunction with his reading
55. A first-grade teacher plans to assess a student's comprehension of a short story through oral retelling. After the student silently reads the story, the teacher will prompt the student's retelling by asking open-ended questions. To prepare for this assessment, the teacher reads the story carefully and composes the questions. Which of the following additional steps would be most helpful for the teacher to take before the retelling activity begins?

A. Prompt the student to recall similar tasks the student has previously performed.

B. Prepare a checklist of the key elements that an effective retelling of this story should include.

C. Review grades earned by the student on recent tests and quizzes in language arts.

D. Remind the student to concentrate on recalling as many details as possible during the retelling.

56. A fifth-grade teacher is teaching a unit on fiction. To begin, students read several simple fairy tales and discuss the moral or meaning of each one. The teacher then assigns a more complex story and leads a discussion about the moral of the story after students finish reading it. This instructional strategy is most likely to promote students' reading proficiency by:

A. guiding students to analyze the relationship between plot and character in a literary text.

B. helping students identify and understand the theme of a literary text.

C. fostering students' ability to distinguish an author's use of fact versus opinion in a text.

D. enhancing students' ability to use self-monitoring strategies to clarify the meaning of a text.
57. A third-grade teacher prepares several poster-sized copies of the star diagram illustrated below.

![Star Diagram](image)

After reading an assigned story, students divide into small groups, and the teacher distributes a copy of the star diagram to each group. The members of each group discuss how the six questions (who, what, when, where, why, and how) apply to the story and write answers in the six points of the star. The teacher then displays the completed star diagrams and leads a whole-class discussion about them. This instructional activity is most likely to promote students' reading proficiency in which of the following ways?

A. improving students' comprehension by encouraging them to analyze a text's underlying theme

B. helping students learn a strategy for using visual representation to analyze key elements of a text

C. improving students' comprehension by encouraging them to connect personal experience to a text

D. helping students learn to use evaluative comprehension skills to determine an author's point of view
58. A sixth-grade teacher has students read a short expository text. After the students finish reading the text, the teacher uses guided discussion to help them complete the form shown below.

<table>
<thead>
<tr>
<th>Topic of the text:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Author's thesis about the topic:</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Evidence presented by the author:</th>
<th>Is this evidence factual and/or reasonable?</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.</td>
<td>1.</td>
</tr>
<tr>
<td>2.</td>
<td>2.</td>
</tr>
<tr>
<td>3.</td>
<td>3.</td>
</tr>
<tr>
<td>4.</td>
<td>4.</td>
</tr>
<tr>
<td>5.</td>
<td>5.</td>
</tr>
</tbody>
</table>

This writing activity promotes students' comprehension and analysis of expository texts primarily by:

A. developing their ability to evaluate the adequacy of an author's conclusions.

B. teaching them explicit strategies for distinguishing facts from opinions.

C. encouraging them to identify ways in which a text reflects the traditions and beliefs of its author.

D. helping them clarify their understanding of a text through the use of outlines.
Use the information below to answer the two questions that follow.

A fourth-grade class is beginning a unit on deserts. The teacher starts the unit by having the students form small groups and list everything they know about deserts. Then the whole class meets to share their lists, and the teacher helps the students arrange their ideas into a web. The class’s partially completed web is shown below.

![Desert Web Diagram]

59. Creating such a web is likely to promote students' ability to retain and use information they read about a topic by:

A. encouraging students to attend to new information on the topic rather than to familiar information.

B. providing students with the vocabulary they need to make sense of their reading.

C. prompting students to assess the accuracy of their prior knowledge of the topic.

D. helping students learn to use categories to organize their thinking about the topic.

60. After giving each student a copy of the web developed by the class, the teacher could best help students make use of the web to learn and retain facts from their reading by asking them to:

A. add continuously to the web as they encounter and analyze new information in their reading.

B. compare the content of this web to the content of webs on other topics.

C. review each category on the web to ensure that it is an appropriate one to have included.

D. memorize the information on the web before they begin their reading.
DIRECTIONS FOR SECTION II: OPEN-ENDED ASSIGNMENTS

Assignments A to E

This section of the test consists of four focused educational problems and instructional tasks and one case study. For each of these assignments, you are to prepare a written response and record it in the area provided on the appropriate Written Response Sheet in the Answer Document or, for the case study, in the Case Study Response Booklet.

Read each assignment carefully before you begin to write. Think about how you will organize what you plan to write. You may use any blank space provided in this test booklet following each assignment to make notes, write an outline, or otherwise prepare your response. Your final responses, however, must be written on the appropriate page(s) of the Answer Document or, for the case study, in the Case Study Response Booklet.

Written responses will be evaluated based on the extent to which they demonstrate knowledge and skills important for effective delivery of a balanced, comprehensive reading program. Read each assignment carefully to ensure that you address all aspects of the assignment. Your responses to the assignments will be evaluated based on the following criteria:

Purpose: The candidate demonstrates an understanding of the relevant content and pedagogical knowledge by fulfilling the purpose of the assignment.

Application of Content: The candidate accurately and effectively applies the relevant content and pedagogical knowledge.

Support: The candidate supports the response with appropriate examples, evidence, and rationales based on the relevant content and pedagogical knowledge.

The approximate weight of each of the individual assignments toward the total examination score is as follows:

<table>
<thead>
<tr>
<th>Assignment</th>
<th>Weight</th>
</tr>
</thead>
<tbody>
<tr>
<td>Assignment A</td>
<td>5%</td>
</tr>
<tr>
<td>Assignment B</td>
<td>5%</td>
</tr>
<tr>
<td>Assignment C</td>
<td>10%</td>
</tr>
<tr>
<td>Assignment D</td>
<td>10%</td>
</tr>
<tr>
<td>Assignment E</td>
<td>20%</td>
</tr>
</tbody>
</table>

The assignments are intended to assess knowledge and skills of reading instruction, not writing ability. Your responses, however, must be communicated clearly enough to permit a valid judgment of your knowledge and skills. Your responses should be written for an audience of educators knowledgeable about reading instruction.

The final version of each response should conform to the conventions of edited American English. Your responses should be your original work, written in your own words, and not copied or paraphrased from some other work. You may, however, use citations when appropriate.

The multiple-choice section of the Answer Document containing your name will be removed from your written responses to maintain your anonymity during the scoring process. Do not write your name on any other portion of the Answer Document, and do not separate any of the sheets from the document.

You may work on the assignments in any order you choose, but be sure to record your final responses in the appropriate locations, as listed in the directions for each individual assignment.
ASSIGNMENT A

Record your written response to Assignment A on the Assignment A Response Sheet on page 3 of the Answer Document. The length of your response is limited to the lined space available on the one-page Assignment A Response Sheet. You are to prepare a written response of approximately 75–125 words to Assignment A.

---

Use the information below to complete the exercise that follows.

A second-grade teacher frequently uses the following strategy when working with struggling readers who are performing below the second-grade fluency benchmark. The teacher selects a variety of supplementary texts that use a controlled vocabulary (i.e., nearly all the words are high-frequency sight words or easily decodable words). The teacher then has the students read these texts aloud quietly to themselves over a period of days as the teacher monitors their reading.

Examinee Task

Using your knowledge of reading fluency, write a response in which you:

- identify what aspect of fluency (i.e., accuracy, reading rate, or prosody) this instructional strategy primarily develops; and

- explain how this instructional strategy promotes development of the aspect you identified.

Be sure to relate your response to specific features of the instructional strategy described above.
